layout: default

title: Workshop outline
Workshop outline
Opening activity (as people arrive)

- Who will you share the stuff from the workshop with? (tie this in to SMART goal at end)

- Share your answer with 3 people.

The old ways (10m)

- Discuss old methods of laying out pages with examples

- Table layouts - see if anyone has built these

- Floats and frameworks (Bootsrap, Foundation, etc) - as above

- Display properties - `inline-block`, `table`

- Positioning - `relative`, `absolute`

- Columns - multiple column layout

Formatting con-text (5m)

- Discuss formatting context in relation to box model

- Use float example with `float-root`

The new ways (non-technical) (10m)

- Introduce **Flexbox**: short history, current browser support

- Introduce **Grid**: W3C intro, current browser support

Flexbox properties (15m)

- Discuss flexbox properties with examples

Break (10m)

Work on flexbox (30m)

- Participants can make changes in the browser to see the various properties at work base don layout-one.html

Grid properties (30m)

- Discuss grid properties with examples

Break (10m)

Work on grid (till end)

- Participants can make changes in the browser to see the various properties at work base don layout-two.html
